

## WIT Yemen receives donation from top Telecommunication company MTN

In June 2009, the WIT Yemen program received an exciting donation from MTN, a telecommunications company which provides mobile service to Yemen.

MTN, impressed with the unprecedented success of the WIT program, donated 15 new computers along with chairs, desks and white board to our local partner, Attakaful for Solidarity and Social Care in Taiz. This new lab allowed Attakaful to expand the number of classes and accommodate more women with an additional 22 students already enrolled. MTN donated an additional 5 computers to a second WIT partner, Khadija Association in the Yareem province, allowing for more women to take the course.

A ceremony with representatives from MTN was held on June 9<sup>th</sup> to celebrate the launching of the new lab and was widely attended by VIPs, students, WIT staff and members of the community. We congratulate the WIT Yemen team and partners for all their outstanding efforts in securing this donation and for their continued impressive work.
